CANVA

As an architect and full stack developer, I seek to enhance both disciplines I have developed throughout my career. From architecture, I highlight my ability to engage with clients, gather requirements, and design solutions tailored to their needs, while also managing collaborative work with technical teams to bring projects to life. On the other hand, as a developer, I have strong knowledge of modern technologies, which allows me to contribute with innovative and efficient solutions.

EXPERIENCE

Architect - independent

nov 2023 - present

Design, Client Relations & Project Coordination

- Designed 7 retail spaces and 3 residential homes for clients across Chile, managing the full design process and securing all required municipal permits for construction.
- Maintained constant communication with clients to understand their vision and ensure satisfaction throughout the project.
- Coordinated with multi-disciplinary teams over 5 that includes engineers and technicians.

English Tutor (Freelance)

april 2024 - present

Conversational English Coaching

- Customized teaching methods to fit various professional and technical vocabulary needs, boosting learners' English proficiency and communication skills in workplace settings.
- Help students build confidence in real-life conversations through practical speaking exercises and tailored lessons.

Architect - ProActiva

sep 2021 - august 2023

Technical Office Coordinator

- Coordinated design, specialties, applications, and supervision for projects under D.S. 27, D.S. 255, and D.S. 49, focused on remodeling social housing and condominiums. Work included roof renovations, photovoltaic panel installation, and electrical planning, improving over 700 homes.

Project Manager - Siigsa

jan 2019 - jan 2021

Software Development Projects (Web & Mobile Applications)

- Led cross-functional teams to develop 2 web apps and 1 mobile app, translating client requirements into technical solutions. Delivered custom software tools. Including an energy e-commerce platform and an internal HR system. While ensuring smooth communication between clients and development teams.
